

Land development and subdivision services provided by SE&A are sought after by private developers for many commercial and residential expansions within Montana communities. Our firm has extensive experience with the many components of developing well planned residential communities and commercial subdivisions. Our staff is noted for their ability to efficiently move projects through the regulatory maze of city, county, and state requirements.

We have the ability to provide clients with the full range of tasks required for development. Starting with planning and feasibility study we can then take a project to final design and construction. As noted in many of the projects, our expertise includes, traffic study, survey, environmental assessment, preliminary and final design of streets, parking, curb and gutter, and landscape, water and wastewater system design, and permitting. We follow up our designs with complete construction bid administration, on-site inspection and certification.

"The values and work ethic at Stahly Engineering are the result of over 35 years of maintaining the life principles of hard work and integrity."

- Greg Benjamin, P.E., Principal
